### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In claim 6, line 1, "vA" has been deleted; same line before "system for global positioning system", --A-- has been inserted.

### **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

This communication is an Examiner's reasons for allowance in response to application filed on 06/20/2003, assigned serial 10/600,174 and titled "Method and Apparatus for Real Time Clock (RTC) Brownout Detection."

The following is the Examiner's statement of reasons for the indication of allowable subject matter:

As discussed in the previous office action the reference to King et al. (US 5893044) contains some features as recited in the claims. For example, King et al. teach the following: a GPS clock that is calibrated to GPS time when the GPS receiver system is navigating using GPS satellite data, wherein the GPS clock is configured to be turned off when the GPS receiver system is not navigating. However, after carefully review the cited prior art, the examiner has recognized that King et al. do not suggest a brownout detection circuit coupled to the RTC, wherein the brownout detection circuit is configured to detect a loss of RTC clock cycles.

Art Unit: 3663

There are some prior art has been cited as teaching the GPS system including the real time clock, but they are missing to disclose the brownout detection circuit coupled to the RTC as represented above.

The prior art does not contain any teaching that would lead a skilled person to modify the closest prior and thereby arrive at the invention. Therefore, the claimed invention is now patentable.

New corrected drawings are required in this application because the following: figure 2 through figure 6, figure 7B, and figure 7C contain hand-writting and hand drawing. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan C To whose telephone number is (703) 308-6273. The examiner can normally be reached on from 8:00AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on (703) 305-8233.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
